

QUESTIONS AND ANSWERS # 2
RFP # 9157 FOR FLEET MANAGEMENT INFORMATION SYSTEM

RFP ISSUED ON SEPTEMBER 10, 2025

No.	Questions	Answers
1.	The requirements matrix provided is over 60 pages. If respondents are expected to respond line by line within our submission, can you please confirm whether this table will be excluded from the proposal response's 30-page limit? Or should it instead be submitted as a separate appendix?	Proposers are not expected or required to submit a line-by-line response to Attachment F - Fleet System Capabilities. The purpose of that document is to be informational and provide SacSewer's requirements that should be addressed in some form in the written proposal.
2.	If we include a statement of work document as an appendix in our submission, will that be counted against the page count?	Per Section 9 of the RFP, all documents will be counted against the 30-page limit, except for those documents that are explicitly listed as being exempted. Statement of Works may be requested at a future point in this process but are not required in the proposal.
