

Question and Response

RFP#8521 Electrician Contract Services

Question #1

How many calls could we expect on a monthly basis to service the various electrical needs around the facility. What is the expectation that you have for your electrical contractor.

Response #1

We estimate that we would call on the contractor approximately 4-12 times per year. Usually the smaller jobs (a week or less) would be on a T&M basis, and quite often the District will provide material since we do stock quite a bit of various material and equipment. On larger jobs we may request a quote or agree on a 'not to exceed' amount.
