

## Questions and Responses

### RFP#8531 Ferric Chloride Contract

#### Question #1

Please confirm the estimated start date of the initial contract.

#### Response #1

The expected start date of the initial contract is May 21, 2026.

#### Question #2

Please clarify whether the stated quantity of 1,680 tons of Ferric Chloride represents an annual quantity or the total quantity for the initial three-year term.

#### Response #2

The 1,680 tons of Ferric Chloride is our estimation for the annual demand.

#### Question #3

Please confirm the quantity of Ferric Chloride per truckload delivery.

#### Response #3

We typically receive 9 to 10 tons per delivery truck, though we do not set a limit on the individual truck's load.

#### Question #4

When delivering polymer, do you want the certificate of analysis electronically, as a hard copy, or both?

#### Response #4

Only a hard copy of the certificate of analysis will be required with each delivery.
